

Supplemental Material 4. Estimation of Lateral E/e' for African Ancestry and Self-Declared Race.

Estimation of lateral E/e' for differences in the African ancestry of 10%*

African Ancestry	Estimated	95% Confidence interval		95% Prediction Interval	
		Lower	Upper	Lower	Upper
		40%	8.808	7.715	9.901
50%	9.033	7.890	10.176	3.358	14.708

Estimation of lateral E/e' for differences in self-declared race*

Race	Estimated	95% Confidence Interval		95% Prediction Interval	
		Lower	Upper	Lower	Upper
		Non-white	8.611	7.503	9.718
White	8.112	6.968	9.257	2.379	13.846

* Estimates were adjusted for age, chronic renal failure, gender, mean arterial pressure,
