Supplemental Figure 1

Patient flowsheet outlining patient inclusion, exclusion and outcomes.

1125 unique patient records identified

180 patients excluded
- 77 Patients underwent cardiac surgery or were transferred
- 56 patients primary diagnosis was not CHF or AF
- 47 patients died in hospital
- 10 patients with no LVEF determination

935 patients included

356 all-cause deaths

538 Cardiovascular Re-admissions
- 390 admissions for CHF
- 70 for AF
- 54 for Acute Coronary Syndrome
- 24 for stroke
Supplemental Figure 2

Adjusted hazard ratios and 95% Confidence intervals for groups of admission heart rate.

Admission heart rates between 60 and 79 beats per minute were used as the reference group.
