

**Supplementary Table 2 – Exploration of different cut-offs**

	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>
Percentage of patients receiving MSCT	33	36	56	61
Sensitivity	88	86	70	63
Specificity	40	44	64	68
Positive predictive value	32	33	38	39
Negative predictive value	91	91	87	85
Price per patient (€)	983	974	967	989
Radiation per patient (mSv)	7.1	7.0	6.8	6.9

The results of different proposed cut-offs calculated on the Web-PATS cohort. Calculated with the mean price of MSCT and CAG of 1129.3 € for CAG and 395.74 € for MSCT and radiation dosage (mSv) calculated for a mean dosage of 8.5 mSv for CAG and 2.1 mSv for MSCT. (MSCT – Multislice Computed Tomography, CAG – Coronary Angiography)
