

**Video:**

Patient 1 – Transthoracic echocardiogram of patient 1, shows typical takotsubo cardiomyopathy (TC) variant.

Patient 2: TTE of patient 2, shows biventricular variant of TC. White arrow indicating apical hypo/akinesis and red arrow shows basal right ventricular hyperkinesis.

Patient 3: TTE of patient3, shows reverse or inverted TC variant.

Patient 4: TTE of patient 4, shows typical takotsubo cardiomyopathy (TC) variant.

Patient 5: TTE of patient 6, shows global takotsubo cardiomyopathy (TC) with apical cap sparing variant.

Patient 6: TTE of patient 6, shows reverse or inverted TC variant.

Patient 7: TTE of patient 7, shows typical TC variant.
