

**Supplemental Table 1 The association of non-pharmacological intervention with the relationship between the clinical parameters used for the estimation of the *predicted*-BNP<sub>dis</sub> and BNP<sub>dis</sub>.**

Variables	p Value
Cardiac resynchronization therapy	0.1159
Percutaneous coronary intervention	0.1559
Catheter ablation	0.9407
Valve surgery	0.7322
Non-pharmacological intervention (any above)	0.0814
