

Appendix 1

1. What is your default access for elective angioplasty?

Radial/femoral

2. What is your default access for NSTEMI PCI?

Radial/femoral

3. What is your default access for PPCI?

Radial/femoral

4. If you fail at radial access (for default radial operators) where do you go next?

Other radial/femoral

5. Which anti-platelet do you use for NSTEMI PCI?

Clopidogrel/prasugrel/ticagrelor/tailored (individualized therapy)

6. Which anti-platelet do you use for PPCI?

Clopidogrel/prasugrel/ticagrelor/tailored (individualized therapy)

7. What is your routine adjunctive pharmacology for stable angina PCI (multiple ticks allowed)

Unfractionated heparin/LMWH/glycoprotein inhibitor bail-out/bivalirudin bail-out

8. What is your routine adjunctive pharmacology for NSTEMI PCI (multiple ticks allowed)?

Unfractionated heparin/LMWH/glycoprotein inhibitors/glycoprotein inhibitors for bail-out/bivalirudin/bivalirudin for bail-out

9. What is your routine adjunctive pharmacology for PPCI (multiple ticks allowed)?

Unfractionated heparin/LMWH/glycoprotein inhibitors/glycoprotein inhibitors for bail-out/bivalirudin/bivalirudin for bail-out

10. What year did you qualify?
