Supplemental Figures and Legends

Supplemental figure 1: Crude incidence rates per 1,000 person years (PY) of IE per two-year intervals. Analyses were stratified by sex (women (blue) and men (red)). A linear regression model was plotted to examine crude difference per calendar year.

Supplemental figure 2: Crude incidence rates per 1,000 person years (PY) of IE per two-year intervals. Analyses were stratified by age groups (<70 (blue) and >=70(red) years). A linear regression model was plotted to examine crude difference per calendar year.
